

Temperature Control Unit AT-5900

Eliminate the costly effects of temperature variations occurring from morning-to-night and season-to-season.

Designed to control the temperature of fluids like paint, sealant or adhesive to within $\pm 1^\circ\text{F}$

Improve overall stability, repeatability, and first-pass yield of the application process

- Self-contained Temperature Control System
- Available in Single & Dual Circuit Designs
- Available in Heat Only & Heat/Cool
- All Voltages & CE Versions Available
- Up to 15,000 btu/hr Heating & up to 6,000 btu/hr Cooling
- Ideal For Most Paint, Sealant or Adhesive Applications
- Compatible With all Saint Clair Systems Heat Exchangers & Peripherals
